Growing Instructions

Bell Pepper – California Wonder

Planting:

- Start seeds indoors in **Jan–Feb**; transplant outdoors **Mar–Apr**
- Plant seedlings 18–24" apart

Sun:

- Full sun; provide **afternoon shade** once temps exceed 95°F

Water:

- Keep soil evenly moist; water deeply 1–2 times/week
- Mulch to keep roots cool

Soil:

- Rich, well-drained soil with compost

Care:

- Fertilize lightly after flowering
- Protect from extreme heat with shade cloth

Harvest:

- Pick green peppers at ~70 days
- Allow to turn red for sweeter flavor
