

Seed Library

Growing Instructions

Carrots – Nantes

Planting:

- Sow seeds **Sept–Mar**.
- Plant **¼" deep** in loose, rock-free soil.

Sun:

- Full sun; light afternoon shade helps as temps rise.

Water:

- Keep soil consistently moist for even germination.
- Mulch to keep soil cool.

Soil:

- Loose, sandy/loamy soil at least **10–12"** deep.

Care:

- Thin seedlings to **2" apart** for straight, full roots.

Harvest:

- Ready in **60–75 days**.
- Pull when roots are **6–7" long** for best flavor.
