

Seed Library

Growing Instructions

Flowering Pollinator Mix

Planting:

- Sow **Oct–Feb** for best results.
- Scatter seeds on soil surface; gently press in.

Sun:

- Full sun; tolerates heat once established.

Water:

- Keep soil moist until sprouted.
- Then water lightly **1–2 times/week**.

Soil:

- Well-drained soil; no fertilizer needed.

Care:

- Thin lightly if overcrowded.
- Remove weeds early.

Bloom:

- Begins **45–75 days** after sowing.
- Peak color in Spring.
